Ekosodin Road
Benin City, Edo State, Nigeria

Summary

Hard-working backend developer eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Developed a blogging website implementing all the CRUD functionalities, also developed a basic REST API and a host of other web applications with a focus to the backend. Passionate about software architecture and cloud computing. Regular attendee of web developer meetups. Motivated to learn, grow and excel in the software development industry.

Experience

Backend Developer

10/2020

- Developed an E-commerce website implementing payment integration with Paypal
- Developed a blogging website implementing all the CRUD functionalities with user registration also.
- Developed a todo list implementing a user registration with social network accounts
- Developed a basic API

All this was done with a focus to the backend and so the front end design and impementation is very minimal

Skills

- Good knowledge of Django
- Medium knowledge of HTML and CSS and JavaScript
- Excellent verbal and written communication skills
- Good critical thinking skills
- Good knowledge of Python
- Good knowledge of Git and Github
- Ability to express thoughts and ideas clearly

Education

Bsc. Pure and Applied Physics

University of Benin • Benin, Edo

Languages

- Fluent English
